

ULTIMATE Acid Eater

- Eliminates powders, booms, socks, pads and caustics with revolutionary technology.
- Neutralizes hazardous acids in a quick, safe and effective manner.
- Transforms hazardous acids into safe, disposable organic salts without any safety or health concerns.
- Eliminates disposal issues and cost as well as safety hazards associated with acid spills .
- A one-to-one neutralization ratio or less with a variety of acids.
- So powerful it will even neutralize dangerous acid vapors that pose safety concerns.
- pH color indicators enable users to monitor the neutralization process without pH instruments.
- Easy to apply on vertical surfaces, hard to reach areas and permeable surfaces.
- Dries quickly and will not leave any residues or stains.
- Safe to use and store, non-hazardous, non-corrosive, biodegradable and environmentally safe.

| Neutralization Ratio & By-products | | | | Ultimate ACID EATER vs. Competition | | | | |
|------------------------------------|-------|---------------------|---------------|-------------------------------------|---------------------|----------------|--------------|---------|
| Type of Acid | Acid | Ultimate Acid Eater | BY-PRODUCT | Issues | Ultimate Acid Eater | Sodium BioCarb | Caustic Soda | Spill X |
| Sulfuric | 1 Gal | 1 Gal | Organic Salts | Neutralization Ratio 1:1 or > | YES | NO | NO | NO |
| Phosphoric | 1 Gal | >1 Gal | Organic Salts | Disposal Costs | NO | YES | YES | YES |
| Hydrochloric | 1 Gal | >1 Gal | Organic Salts | Neutralizes Vapors | YES | NO | NO | NO |
| Acetic | 1 Gal | >1 Gal | Organic Salts | Variety of Uses | YES | NO | NO | NO |
| Nitric | 1 Gal | 1 Gal | Organic Salts | Safety/Health Issues | NO | YES | YES | YES |
| Hydrofluoric | 1 Gal | 1 Gal | Organic Salts | Affected by Conditions | NO | YES | YES | YES |

Being a liquid medium Ultimate Acid Eater offers several advantages over the conventional methods. First, Ultimate Acid eater chemically transforms acids into organic salts and water. Acid spills once neutralized maybe disposed of in wastewater drains, eliminating any disposal costs. Second, Ultimate Acid Eater may be applied and used in a variety of methods and conditions. It may be atomized to "nock-down" greatly reduce the hazardous acid gas vapors, poured onto spills, sprayed in hard-to-reach areas and vertical surfaces as well as being used on acidic soil and water. It also may be used in windy and wet conditions where the conventional methods would be difficult if not impossible to use.
